

LifeBridge ASEND

Remote Learning Provision

What should the learner expect from remote learning?

As soon as we are aware of the need to go towards remote learning for a learner, a member of the staff team will be in touch to establish best access methods. For most learners this will be using 'Google Classroom'. We will review this on a case-by-case basis, for some it may be that work packs and resources are sent by email, post or delivered to the home. A timetable will be shared with the learner and family to set up the expectation of joining the remote education provision.

Expectations for learners:

- Learners are prepared for lessons and have equipment available ready to learn (book, paper, pen, pencil, ruler, rubber etc) Equipment can be provided by college if required.
- Learner to be able to work in a suitable space.
- Learner to be dressed appropriately.
- Learners will not record or take photos during the lesson.
- Learners to ask for help if needed through 'Google Classroom'.

Expectations from staff:

- Staff will ensure that all work is uploaded by 9am.
- Staff will ensure that marking and feedback is provided on a regular basis.
- Staff will make sure that tasks are set at an appropriate level for each learner.
- Staff will make sure that work is engaging and motivating.
- Staff will continue to provide support to all learners as and when needed.

Expectations from parents /carers:

- Parents/carers will be supportive if there are any problems with technology.
- Parents/carers understand that under no circumstances should photographs or videos be taken of the lesson and the screen should not be set to record.
- Parents/carers will be supportive and ensure that there is a suitable quiet place to learn and make sure that they are appropriately dressed for a lesson.
- Parents/carers will ensure that there is appropriate equipment as needed.
- Parents/carers will be supportive and assist the uploading of work to staff.
- Parents/carers are able to ask for help and support by contacting LifeBridge ASEND via email, phone or google classroom.

LifeBridge ASEND can provide technology support to our learners to enable them to access the remote learning. (Devices can be provided where necessary.)
